Title: 🚀 “Welcome to Our Solar System!” 🌞

Materials Needed

- Colored cartolina or construction paper
- ¼ illustration board
- Printed pictures of planets, moon, sun
- You may use special paper and newspaper to create ball-like objects as planets and other celestial bodies. (optional)
- Glue or tape
- Scissors
- Markers or crayons
- Black background paper (for space effect)
- Aluminum foil or glitter (optional for stars)

Steps in Making the Bulletin Board

1. **Prepare the Background**
   Cover the bulletin board with **black paper** to represent outer space.
2. **Create the Sun**
   Place a **big yellow sun** in the center or side of the board.
3. **Make the Planets**
   Students will draw or cut out the **8 planets** and color them.
   - Mercury
   - Venus
   - Earth 🌍
   - Mars
   - Jupiter
   - Saturn (with rings)
   - Uranus
   - Neptune
4. **Add Labels and Facts**
   Each planet should have **1–2 simple facts**, for example:
   - **Mercury** – The closest planet to the Sun.
   - **Earth** – The only planet with life.
   - **Jupiter** – The biggest planet.
5. **Design the Space Theme**
   Add **stars, rockets, astronauts, and comets** around the board.
6. **Arrange in Order**
   Place the planets **in order from the Sun**
