## ■ ABOUT ME

An enthusiastic and detail-oriented IT student passionate about technology, innovation, and teamwork. I enjoy exploring creative solutions to real-world problems through coding and digital tools. Currently pursuing my degree in Information Technology at National University Lipa

## ■ PROJECTS

### Mini Games Development

- Designed and programmed simple interactive games as part of academic activities to strengthen programming and logic-building skills.

### Client Website Development

- Created and hosted a responsive website for a client as part of a group project, focusing on backend logic, functionality, and deployment.

### E-Commerce Application Prototype

- Developed a mobile app concept to complement the client website, integrating key e-commerce features such as product listings and order management.
